Senior Performance Media Buyer focused on making paid acquisition profitable at scale.

Over the last year I managed **\$5.5M+ in ad spend** across **Meta** and **TikTok**, generated **\$6.4M+ in revenue**, and ran up to **12 ad accounts at once** in **Auto Insurance**, **Debt Relief**, and **ACA**. Tight-margin verticals where the **data has to drive every call**, but **speed of execution is what separates good weeks from bad** ones.

When the manual work started eating into that speed, I built an **N8N + Meta API automation system** that **cut 70+ hours a week** in operational overhead and put that time back into testing and scaling.
